Inhoudsopgave

p. 3	Beplantingsconcept
p. 4	Bomen en heesters
p. 12	Bos- en parkvilla
p. 16	Vaste planten
p. 37	Bosranden
p. 44	Beplantingsplan met aantallen

Dit beplantingsplan boek richt zich op het mandelige terrein van de Vereniging van Beheer Eikenstein. De beplanting die zich op de kavel bevindt is opgenomen in de kavelpaspoorten.

Eikenstein richt zich op onderhoudsvriendelijke beplanting, met als doel een jaarrond aantrekkelijke groenstructuur te creëren, terwijl het onderhoud beperkt blijft. De beplanting is robuust, deels inheems en deels wintergroen. Het beplantingsontwerp is gebaseerd op verschillende groenconcepten: een park met bloeiende borders en meerstammige heesters, een groene lustwarande met rhododendrons en bosranden met groepen bosplantsoen, bomen en heesters.

1. Het Park

In het middengebied, dat wordt beschouwd als het park, komen diverse bloeiende borders. Er wordt onderscheid gemaakt tussen:

- Borders die zorgen voor een groene overgang en privacy tussen het wandelpad en de parkwoningen. Deze worden aangevuld met meerstammige, deels inheemse heesters en bomen.
- De bloementuin voor het monument, die bijdraagt aan de sierlijke uitstraling van het gebied.
- Voor de plantenbakken van de parkwoningen is gekozen voor sterke, deels bloeiende vaste planten, waarbij rekening is gehouden met de zonnige en schaduwrijke zijden.

2. Stichtse Lustwarande

Rondom het monument en de nieuwe appartementengebouwen wordt het karakter van de Stichtse Lustwarande versterkt door groepen rhododendrons, met daarboven enkele meerstammige heesters en solitaire bomen.

3. Bosranden

De bosranden achter de boswoningen worden hersteld met grote groepen inheemse bosplantsoorten. Daarnaast worden tussen de bestaande bomen nieuwe inheemse heesters en bomen aangeplant om de natuurlijke structuur te versterken.

1 De bloeiende border met vaste planten, heesters en bomen

2 De groene lustwarande met groepen rhododendron's, heesters en bomen

3 De bosranden met groepen bosplantsoen, nieuwe en bestaande heesters en bomen

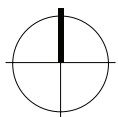

Bomen en meerstammige heesters

Eikenstein is ingedeeld in vier gedeeltes; de bosranden, de stichtse lustwarande, voorterrein/entree monument en het park. In de bosranden en bij de stichtse lustwarande passen we inheemse bomen en meerstammige heesters toe.

In het park en bij het voorterrein passen we een mix van inheemse en uitheemse bomen en meerstammige heesters toe.

Beplantingsplan bomen en meerstammige heesters

legenda bomen en heesters

Bomen bosranden en Stichtse Lustwarande

	Acer campestre		Prunus padus
	Betula pendula		Quercus robur
	Carpinus betulus		Tilia cordata
	Crataegus monogyna		Tilia platyphyllos

Heesters bosranden en Stichtse Lustwarande

	Amelanchier lamarckii		Ilex aquifolium
	Cornus alba		Rhamnus frangula
	Cornus florida		Rhododendron catawbiense
	Cornus mas		Sambucus nigra
	Corylus avellana		Salix caprea
	Euonymus alatus		Taxus baccata
	Fagus sylvatica		Thuja plicata
	Hedera helix arborescens		Viburnum opulus

Bomen middengebiet & entree monument

	Acer campestre		Nyssa sylvatica
	Gleditsia triacanthos 'Sunburst'		Pinus nigra
	Liquidambar styraciflua		Parrotia persica
	Magnolia grandiflora		Tilia cordata

Heesters middengebiet & entree monument

	Acer griseum		Euonymus phellomanus
	Acer rubrum		Hamamelis x intermedia
	Amelanchier lamarckii		Prunus spinosa
	Cercis canadensis		Prunus yedoensis
	Cornus florida		Rhododendron catawbiense
	Cornus kousa		Viburnum plicatum

Vaste planten

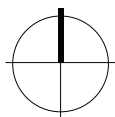

De vaste planten van Eikenstein worden verdeeld over verschillende borders: rondom en voor het monument, de bloementuin en in de borders die zorgen voor privacy en een groene overgang tussen het wandelpad in het park en de parkwoningen.

Boven de borders van de parkwoningen worden meerstammige heesters en bomen geplaatst. De overige borders bestaan uitsluitend uit vaste planten, met hier en daar een solitaire boom of heester.

- The landscape plan illustrates a curved garden bed, likely a border, with various plant groupings and individual plant labels. The plan is divided into several sections, each containing different plant species and varieties. The labels include abbreviations for plant groups (e.g., As.E., As.R., As.B., As.T., Ch.W., Eu.r., Ge.C., Mo.E., Ne.SH., Ph.r.) and individual plants (e.g., B, C, E, L). The plan also shows a central area with a large, open space, possibly a lawn or a large flower bed, and a small, rectangular area with a grid pattern, possibly a path or a small garden bed. The plan is oriented with North at the top, as indicated by the compass rose in the top right corner. A scale bar is located in the bottom right corner of the plan.

Bosranden

- 1. Acer campestre
- 2. Carpinus betulus
- 3. Euonymus europaeus
- 4. Ilex aquifolium
- 5. Rosa rubignosa
- 6. Viburnum tinus

Onder de bomen en heesters worden groepen met bosplantsoen
aangebracht. Zo wordt de bosrand
weer hersteld en groeit deze dicht.

Onder de Eiken en Linde

Bepanting naast kavelnummer 67

Onder de groep bomen (twee eiken en één linde) naast kavelnummer 67 wordt deels wintergroen bosplantsoen aangeplant. Dit is een bewuste keuze, omdat maaien onder deze bomen niet mogelijk is. Door deze bepanting toe te passen, blijft de omgeving toch groen en verzorgd.

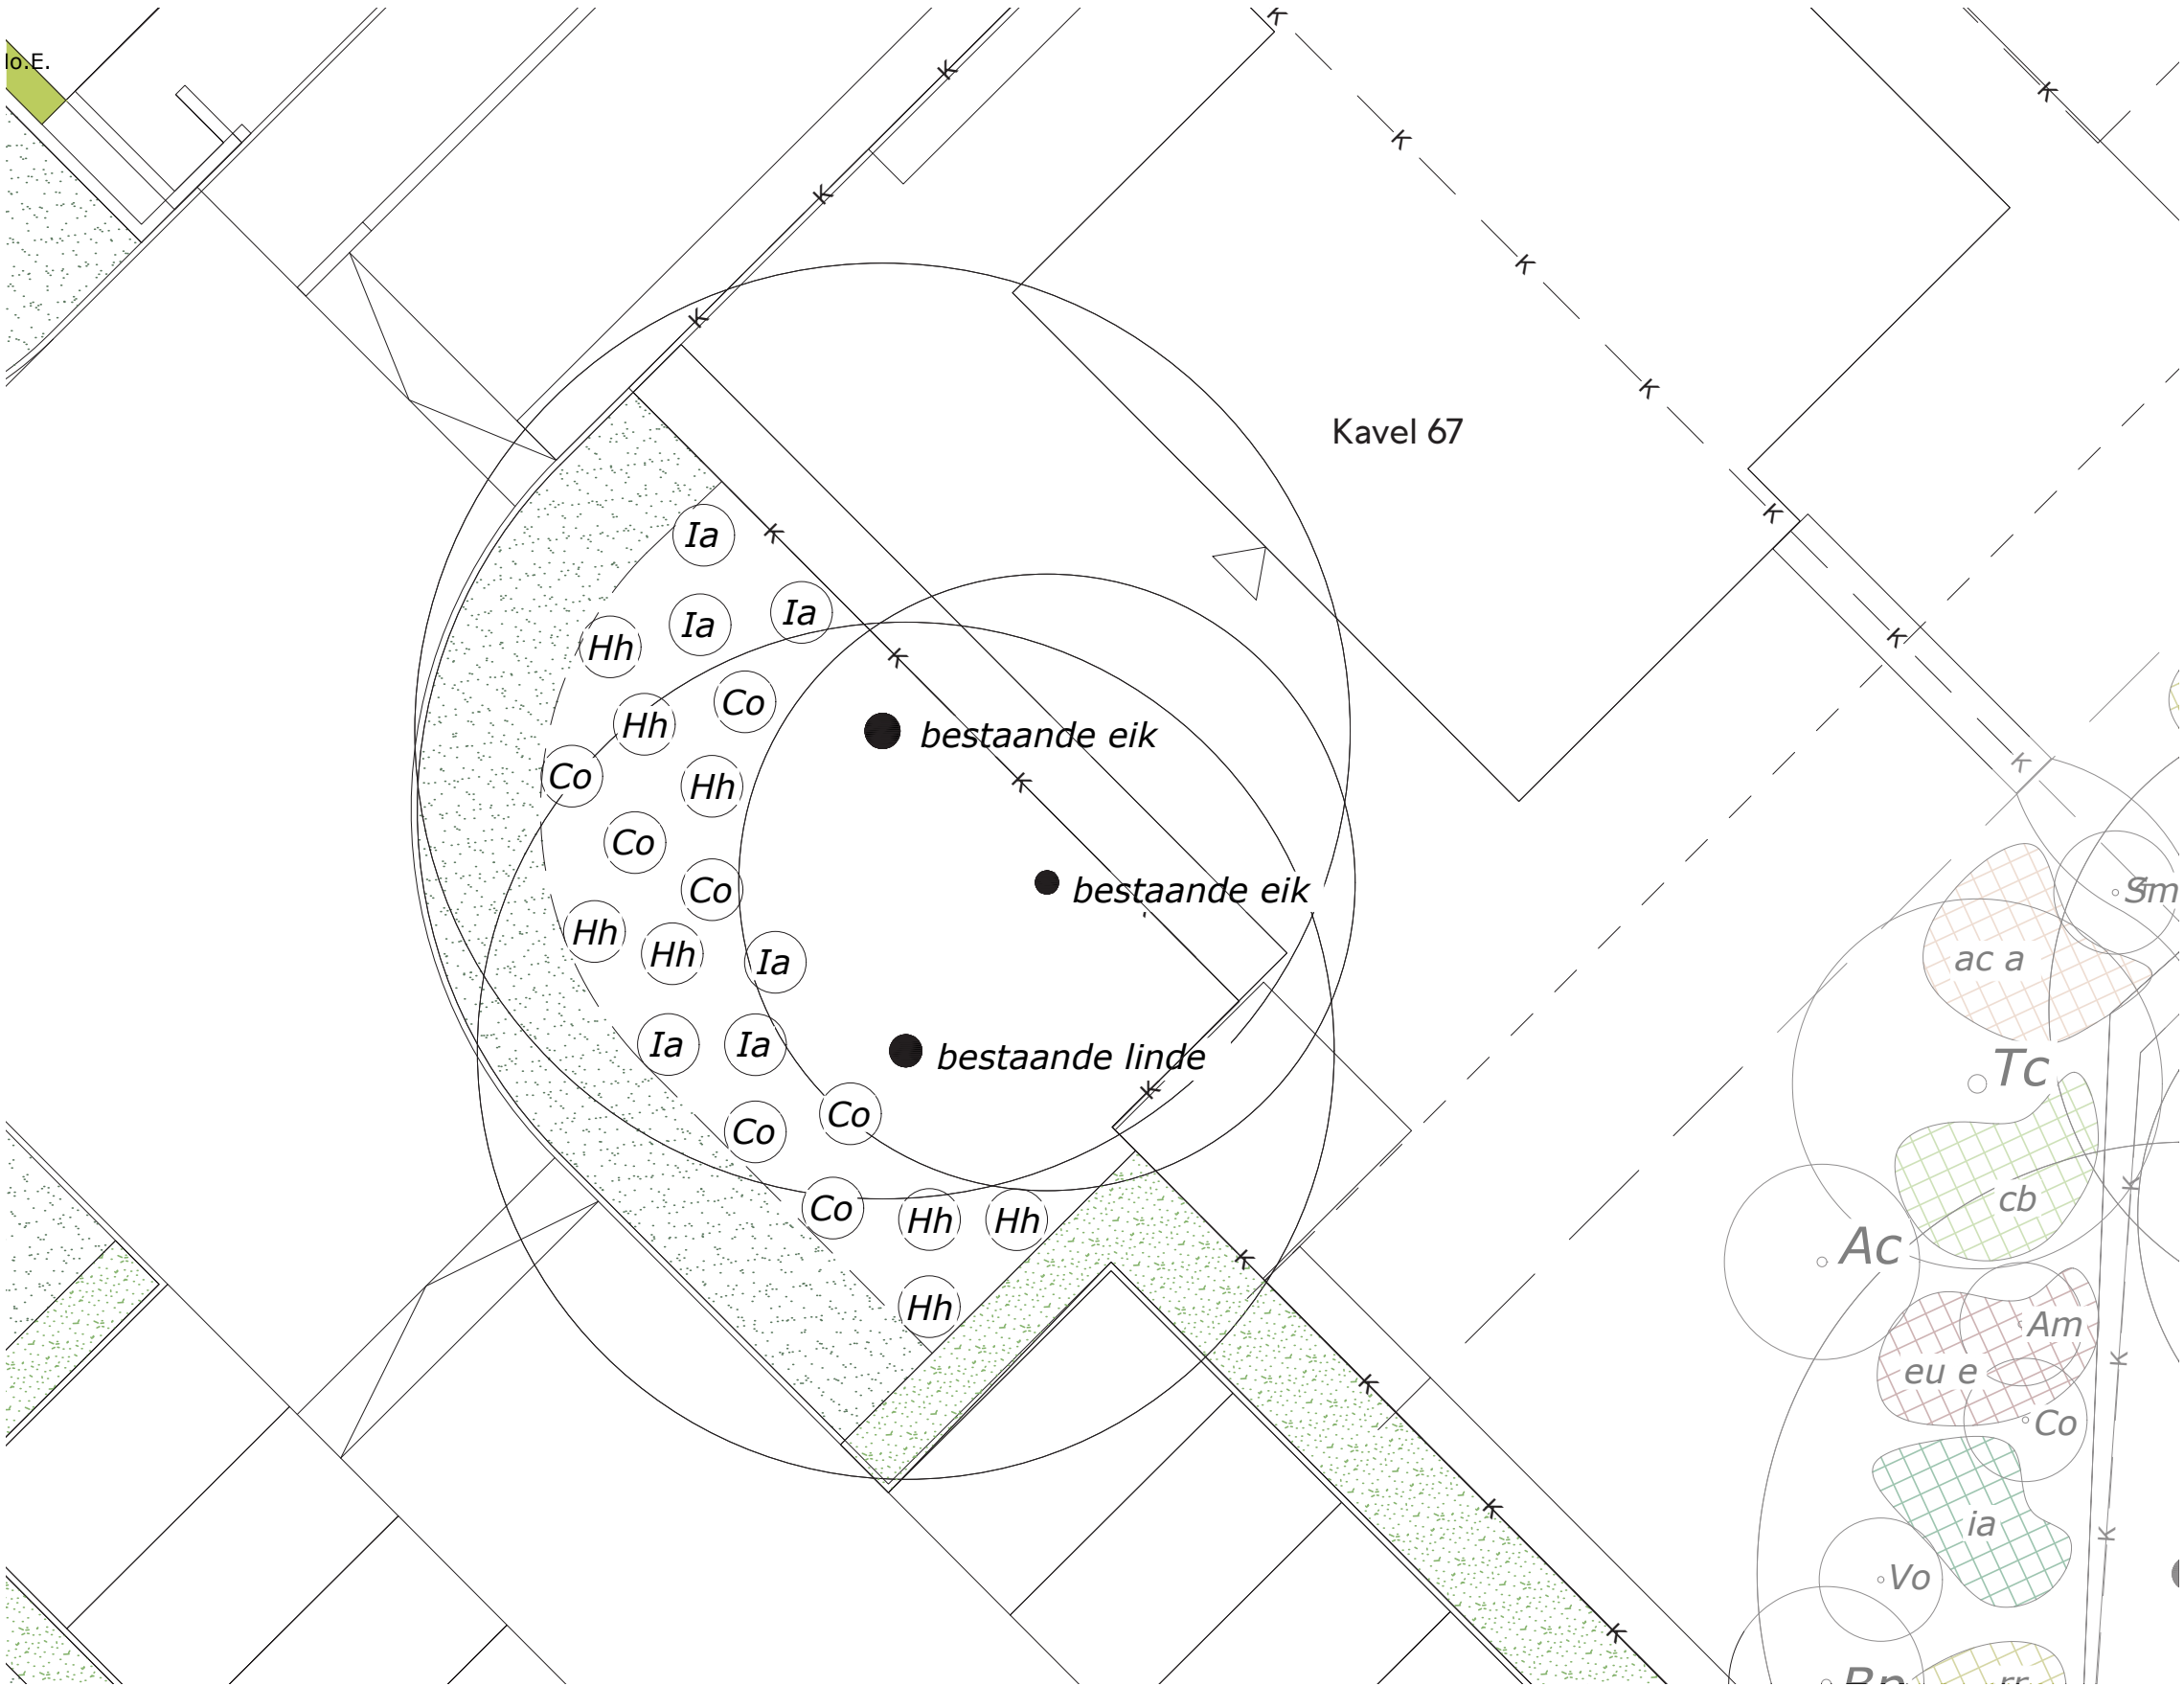

Corylus avellana

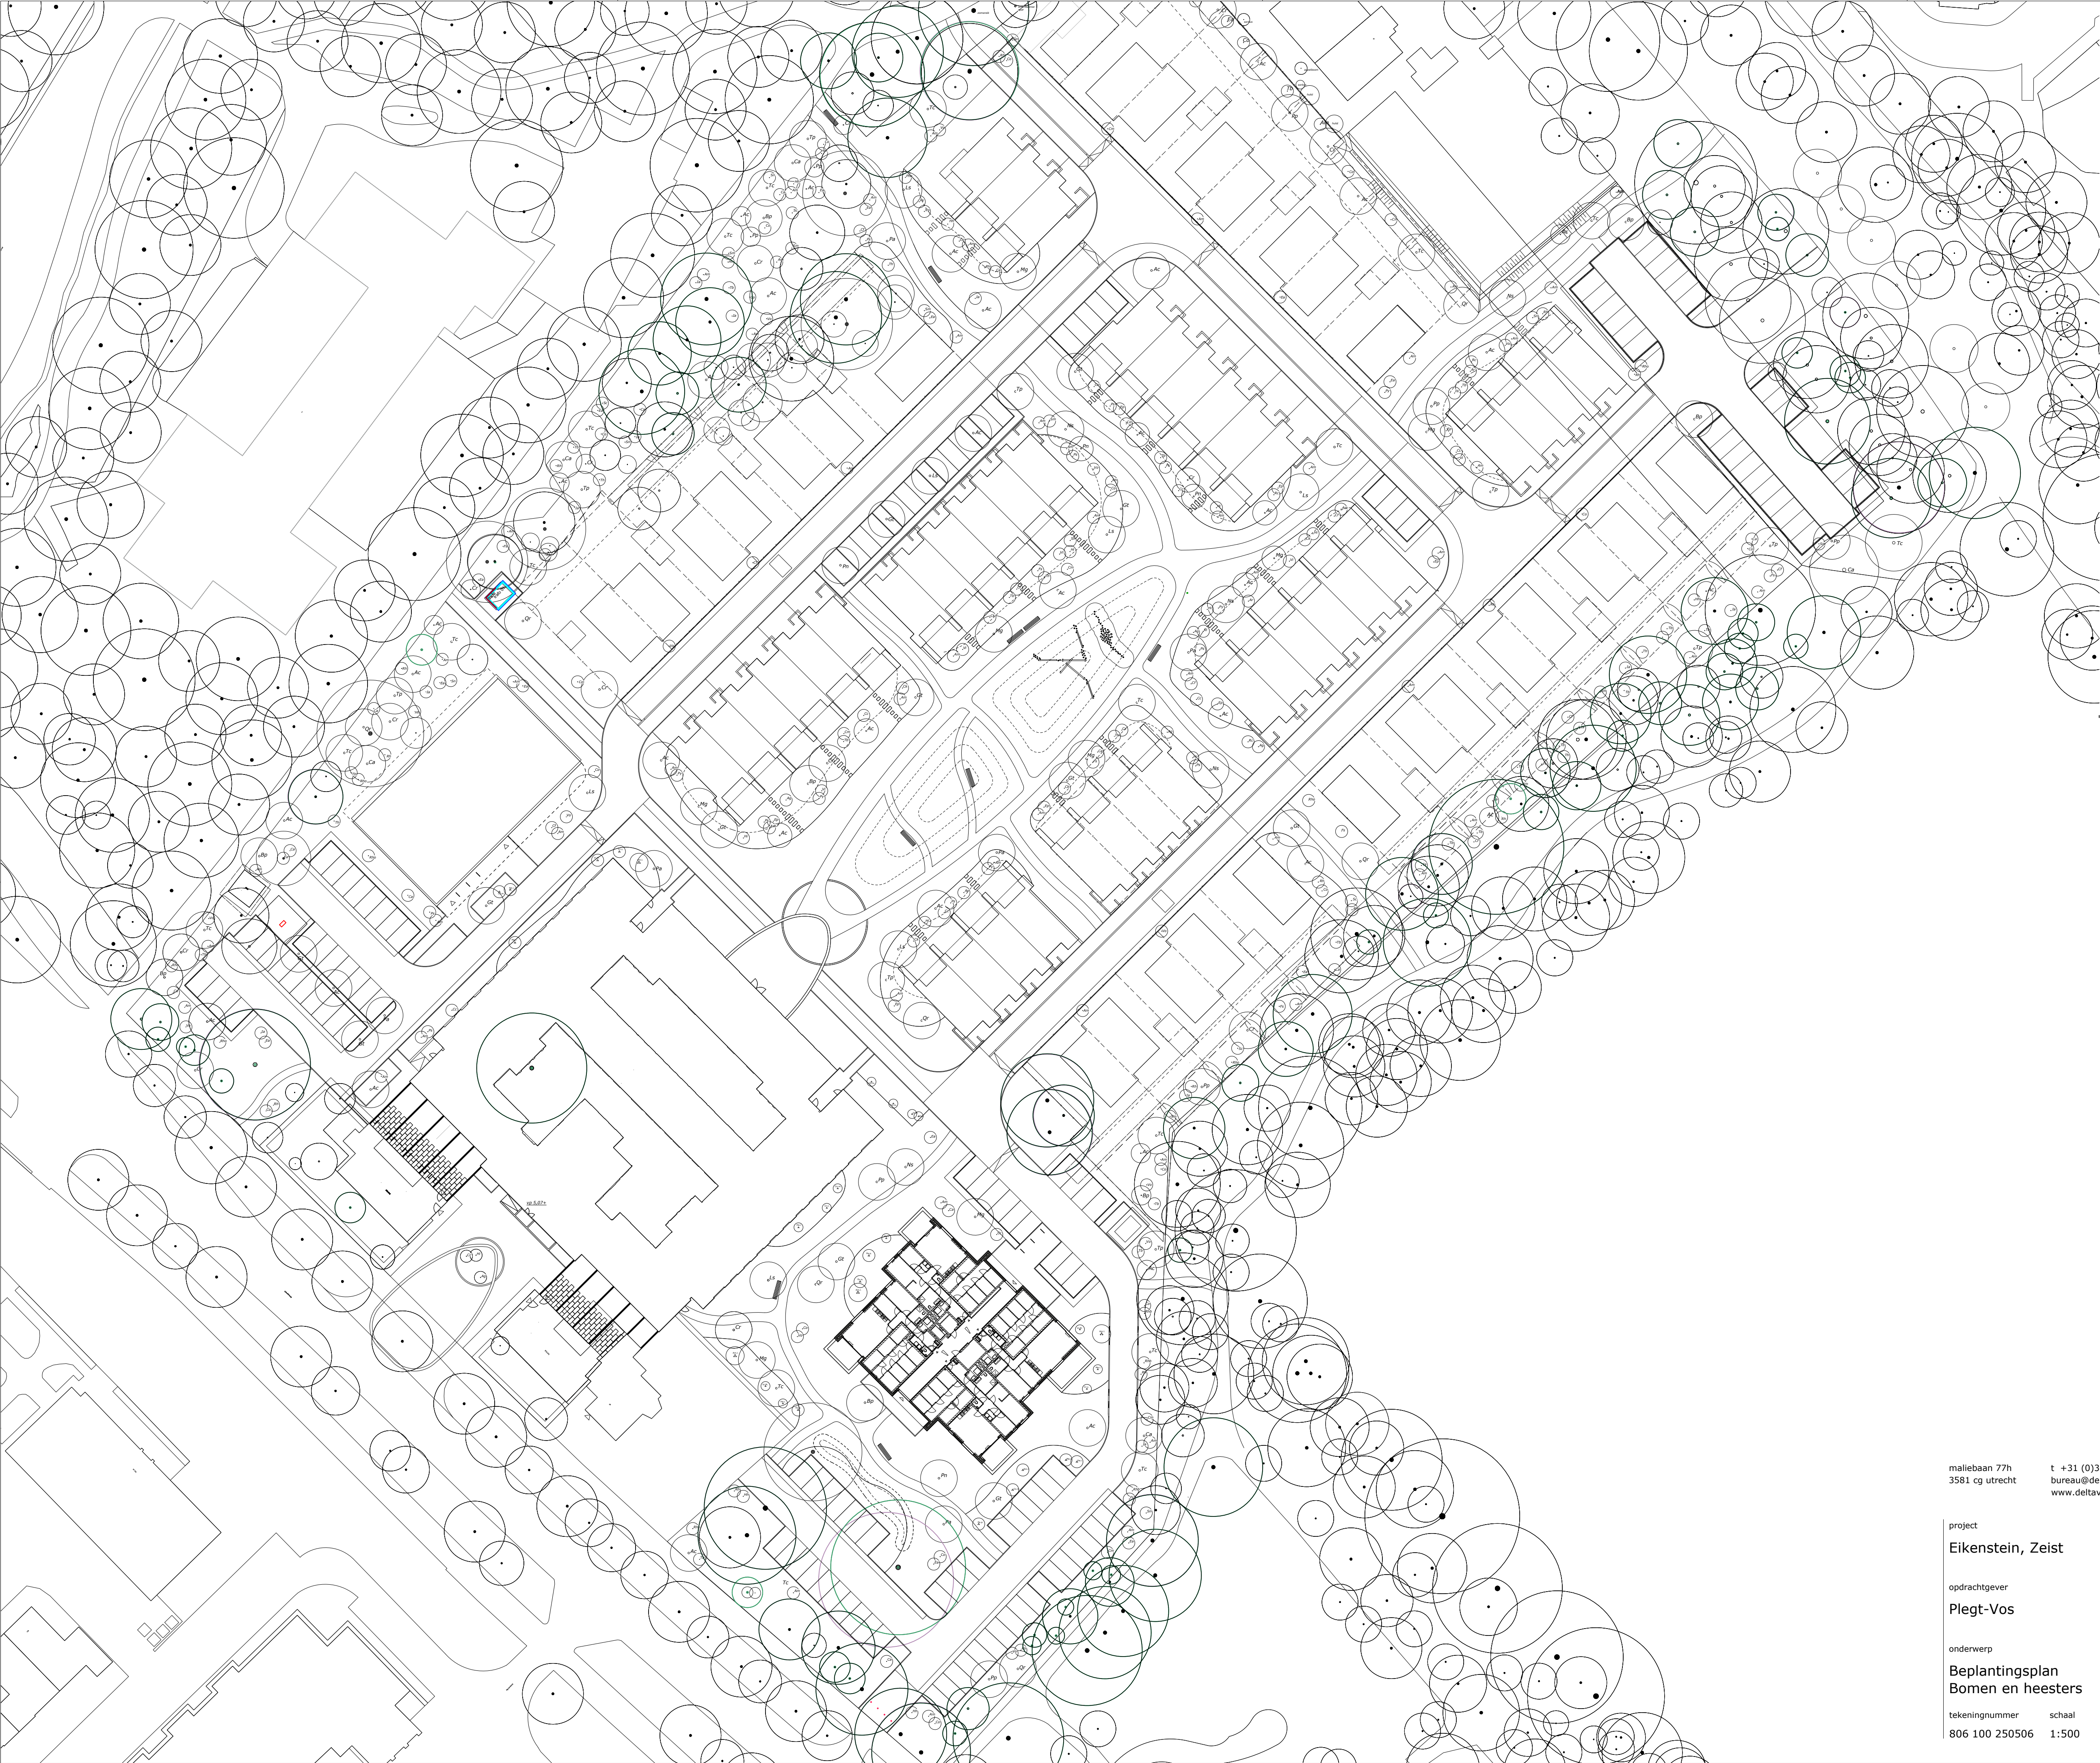

Ilex aquifolium

Hedera helix arborescens
